LinkedIn: <https://www.linkedin.com/in/dominick-george-dev/>

Portfolio: www.domgeorge.dev

Key Skills

- **Programming Languages:** JavaScript (Intermediate), Python (Advanced), Java (Advanced), C++ (Intermediate)
 - **Frontend Technologies:** HTML (Advanced), CSS (Intermediate), Bootstrap, jQuery (Beginner), React (Proficient)
 - **Backend Technologies:** SpringBoot (Intermediate), Flask (Intermediate), Node.js (Proficient)
 - **Databases:** MySQL (MariaDB, SQLITE3), MongoDB
 - **Version Control Systems:** Git, GitHub, Gitlab (Proficient)
 - **Development Tools:** Webpack, RESTful APIs, Gradle, ThymeLeaf
 - **Non-technical:** Team work (Proficient), Communication (Proficient), Conflict resolution (Proficient), Team management (Proficient)
-

Software Development Projects

Client Website Project (University Project)

- A website for Wavelength where a user would collect tokens for conducting meetings with junior developers. [Here](#)
- Featured complex token transactions, user authentication, dynamic web pages and data base manipulation.
- Worked with four team members to present the product in front of peers and client.
- Achieved a fundamental understanding and application of the client web server model.

NHS Recruitment App (University Project)

- Worked in a team of five to create an applicant tracking system for NHS Wales which involved data manipulation, back-end framework development and vigorous unit testing.
- Met with the client frequently throughout development incorporating agile team management methodologies. [Here](#)
- Presented the final product to the client after development.

- Achieved core understanding of developing software in a team using agile methods.

Full Stack Chat App

- Built a responsive, user-friendly chat website application to learn modern front and back end frameworks (NodeJS, React) which allows users to send messages to other users with an account. [Here](#)
- Implemented real-time synchronisation with socket.io. Stores users, chats, messages, and friends upon a cloud database.
- Achieved understanding of full stack development and cloud-based data handling.

Personal Development

Cardiff Autonomous Racing

- The Head of Path Planning whose primary goal is creating the optimal route the car will take when the team compete at Silverstone. This will require me to have hard conversations with other team leads and make big decisions which will decide that fate of the team. I will be using this to be at the forefront of new emerging AI technologies working in a highly competitive team environment. [Here](#)

Individual Projects

- Actively applying myself to learning through online courses, coding bootcamps, and self-directed projects.
- Honed my skills through online courses (HackTheBox), including web requests, intro to web applications, and intro to Linux.
- Built various sized projects like a personal portfolio website, secure login system, and a 2D Java RPG game, applying concepts gathered from various sources.
- Continuously exploring new programming languages, tools and concepts to expand technical knowledge.

Business Transformation in the Age of AI

- Attended a conference in Bristol where industry leaders discussed the cutting-edge technologies currently in development.
- Opened my eyes into realising I am ready to integrate AI in a variety of ways.
- Allowed me to network with a variety of key figures at important companies.
- Gives me a valuable insight into the current industry standard and how businesses will be progressing, going forward.

Education

Bsc in Applied Software Engineering (Cardiff University, 2026)

On track for a 1st:

- Relevant Coursework: Web Development, Object-Oriented Programming, DevOps, Database Management Systems, Computational Thinking, Commercial Applications of Java, Mobile Development

A-Level Computer Science – C (2023)

Gwernyfed High School, Three Cocks, Brecon, Wales

- Relevant Coursework: Programmed Solution to a Problem (A)
- Relevant Subjects: Data Storage, Networking, Data Transmission, Database Systems, Algorithms & Programs, Systems Analysis, Practical Programming

GCSE Computer Science – A (2021)

Gwernyfed High School

- Relevant Subjects: Intro to Web Development, Data Structures, Hardware, Logical Operations, Communication, System Software, Principles of Programming, Program Construction, Security and Data Management

Languages

- **English:** Fluent
- **Welsh:** Intermediate
